

AGREEMENT

Between

THE INTERNATIONAL CENTRE FOR RESEARCH IN AGROFORESTRY

And

THE PERUVIAN AMAZON RESEARCH INSTITUTE

The International Centre for Research in Agroforestry of P.O. Box 30677-00100 Nairobi, Kenya, (hereinafter referred to as "ICRAF" and also known by the brand name "World Agroforestry Centre") wishes to enter into an agreement with the Peruvian Amazon Research Institute (henceforth referred to as "IIAP") on the terms and conditions set out below:

Prelude:

This document certifies a Specific Agreement between THE PERUVIAN AMAZON RESEARCH INSTITUTE, henceforth referred to as "IIAP", RUC N° 20171781648, legal address at Av. Abelardo Quiñones Km. 2.5, San Juan district, Maynas province, Loreto department, duly represented by its president Dr. LUIS EXQUIEL CAMPOS BACA, DNI N° 05402721; and the INTERNATIONAL CENTRE FOR RESEARCH IN AGROFORESTRY, KENYA, also known by the brand name "World Agroforestry Centre", henceforth "ICRAF", represented by its Director General, Dr. ANTHONY SIMONS, passport number 099252551, legal address at United Nations Avenue, Gigiri, and of P.O, Box 30677, 00100, Nairobi, Kenya.

IIAP and ICRAF guarantee and have the capacity to enter into this specific agreement within the Interinstitutional Cooperation Framework Agreement signed 21.5.14 (IIAP) and 4.6.14 (ICRAF), specifically its third and fourth clauses, which establish the following: "Both parties commit to contributing, according to their respective internal objectives and standards, to the development of concrete activities, which will be the subject of specific agreements within which the present agreement should be referenced." (Clause Three).

"The present agreement framework will be implemented through specific agreements, which will be jointly defined in areas and topics of common interest, in which general and specific objectives, timelines, budgets, methods, and anything that would be considered necessary for sound execution with the aim of obtaining results, successes and impacts, will be detailed." (Clause Four).

WHEREAS both ICRAF and Partner warrant and represent that they both have capacity to enter into this agreement and the persons executing this agreement on their behalf are duly authorized and empowered to do so;

WHEREAS this Agreement is under the financing of a Project Agreement between ICRAF and International Water Management Institute (IWMI) (ICRAF Donor) under the

Water, Land and Ecosystems CRP, dated (hereinafter referred to as the "Project Agreement");

WHEREAS it is intended that this Agreement be subject to the availability of funds from the grant from IWMI;

WHEREAS ICRAF and IIAP are hereinafter referred to as individually as 'Party' and collectively as "Parties"

NOW THEREFORE the Parties hereby agree as follows:

1. Background

The restoration of degraded land is recognized as a priority in Peru's environmental agenda 2015-2016, and recently Peru, through the Ministry of Agriculture and in the framework of the 20x20 Initiative coordinated by World Resources Institute, has committed to restore 3.2 M ha of degraded land by 2020.

ICRAF and IIAP share expertise on the field of detection and rehabilitation of degraded land and related fields, including remote sensing and soil science.

The Land Degradation Surveillance Framework (LDSF) was developed by ICRAF to provide a baseline and monitoring and evaluation framework for assessing processes of land degradation and the effectiveness of rehabilitation measures over time. It is based on cutting-edge soil analysis techniques (employing spectral analysis and remote sensing) and a carefully designed socioeconomic survey approach, integrated in a bias-protected, hierarchical sampling scheme. Results are analyzed and built upon through advanced statistical analysis and modeling. Developed as a response to a lack of methods for systematic landscape-level assessment of soil and ecosystem health, the LDSF also permits development of models for the monitoring of degradation metrics at finer spatial resolution (30m for regional to local analysis and 5m for local mapping).

Recently IIAP and ICRAF have collaborated in the field sampling for LDSF in parts of the Western Amazon Sentinel Landscape (IMSAO). It is of both institutions' interest to strengthen capacity in Peru in LDSF implementation, including not only sampling procedures but also analytical capability. For ICRAF, this represents an important opportunity for wider application of an important international public good (LDSF). IIAP, due to its broad mandate for work in the Amazon, its affiliation with the Environment Ministry, its long history of work in this and related fields, and its demonstrated capacity for sustainable operation of laboratory facilities in the Amazon (e.g. remote sensing, molecular biology) is a highly suitable organization to host this improved capacity.

2. Objectives

The objective of the agreement is for the Partner to undertake the activities described in the Work Plan annexed to this agreement as Annex 1.

3. Timing – Commencement and Completion

This agreement comes into effect on September 1st, 2015 and will be carried out for a period of 6 months ending on February 28th, 2016.

Should it become evident to either Party during the implementation of the Project that an extension beyond the expiration date set out in paragraph 1, above, of the present Article, will be necessary to achieve the Objectives of the Project, that Party shall, without delay, inform the other Party, with a view to entering into consultations to agree on a new termination date. Upon agreement on a termination date, the Parties shall conclude an amendment to this effect, in accordance with Article 11 of Annex 4 attached.
